Electrical

Amperage	350mA
Maximum Wattage	42W

The Wise Chameleon Switching Slave Outdoor Box is an IP54 rated wall mounted box specifically designed to allow outdoor wireless colour change lighting. The unit is designed to work in conjunction with a WISERGB BOX 42W and is used when an extra 2 slave are required. When used in conjunction with a WISERGB BOX 42W, a total of 84W of RGB LEDs can be controlled. The box is small and discrete enough to be hidden away, while remaining durable enough to handle all forms of weather. The Wise Chameleon Outdoor Box contains 2 Wise Chameleon Slave which needs to be connected to the Slave in the master box using a data cable, and a 60W, 24VDC power supply. Glands situated at the bottom of the box stops moisture from entering while allowing cables to exit.

Caution: The warm white produced by RGB products is not the same as the warm white produced by single coloured products. By mixing the colours to create warm white a hint of Red, Green, or Blue may appear.
