

Chameleon Colour Change RGB

Wise SyncroLED RGB Master

350mA 21W

WISESYNCRGB 21M

Type: 350mA

Maximum Wattage: 21W

£144.00

Excl. VAT and Delivery

The **Wise SyncroLED RGB Master** offers the same capability as your standard Chameleon yet with less wiring needed for it. The master receives the signal from the transmitter and then passes the signal on to the slave wirelessly without the need for cables between the master and slaves. Each pack only requires to be wired to a power supply

Caution: The warm white produced by RGB products is not the same as the warm white produced by single coloured products. By mixing the colours to create warm white a hint of Red, Green, or Blue may appear.
